# FOUL WEATHER RACE EQUIPMENT

FRESH THINKING. INNOVATIVE PRODUCTS. PRO RACE-FOCUSED PERFORMANCE. CHANGE THE WAY YOU DRESS FOR RAIN AND CYCLOCROSS.

We believe that everything can be made better. This season we’ve concentrated our creative team’s attention on rain gear to protect you in the worst conditions. But we didn’t expect to come up with foul-weather gear this versatile. You may end up using some of these pieces for dry conditions. They’re that good.

For cyclocross we’re bringing performance advantages by helping you in the pre-race preparation to give you a boost in the crucial sprint from the line and the first few minutes of the race.

Throughout this book Castelli athletes will give their pro tips for the perfect winter riding kit and layering gained over years of training and racing in cold and wet weather conditions. What we call Foul Weather Race Equipment.

# CYCLOCROSS

## ANTICIPATION

You've been waiting for it since the end of road season. Colored leaves begin to spin down from trees, and clouds darken. You show up at the race beneath a cold, gray sky that threatens to inundate the course with rain within the hour.

It's time to layer up and get your bike from the van to the team tent as quickly as possible. Rain begins to fall heavily as you make a few last-minute adjustments to tire pressure.

Just as suddenly, the rain lets up and it's time to pre-ride the course. You don your warm-up layers and head out for some quick recon.

Rocky run-up here, off-camber section there: you've got it figured out. Your breath steams in the cool air as you hear your call-up. At the line, you quickly shed your layers. You're warm and ready to put in your 60 minutes. The wait is over.

'CROSS SANREMO SPEEDSUIT 4514501

Thermoflex fleece fabric on upper part  
Single-piece construction of shorts with Action 290 fabric for stretch and durability  
Full-length YKK® Vislon zipper with large pull tab that can be easily grabbed with muddy gloves  
3/4-length sleeves to take off the chill  
Nervato fabric insert under arms allows for temperature regulation and shoulder room for off-the-bike flexibility  
Higher neck provides extra warmth  
GIRO® single-layer sublimation-printed leg ending  
KISS Air seat pad for great protection but minimum bulk  
2 rear pockets make this a great piece for 'cross training or cool-weather rides

SIZES: XS-3XL    WEIGHT: 350g (Large)    0°-12°C / 32°-53°F

038  
VINTAGE BLACK/SPRINT GREEN

010  
BLACK

PRO TIP

PRESSURE WASHING

Ryan Trebon  
(Team Cannondale)

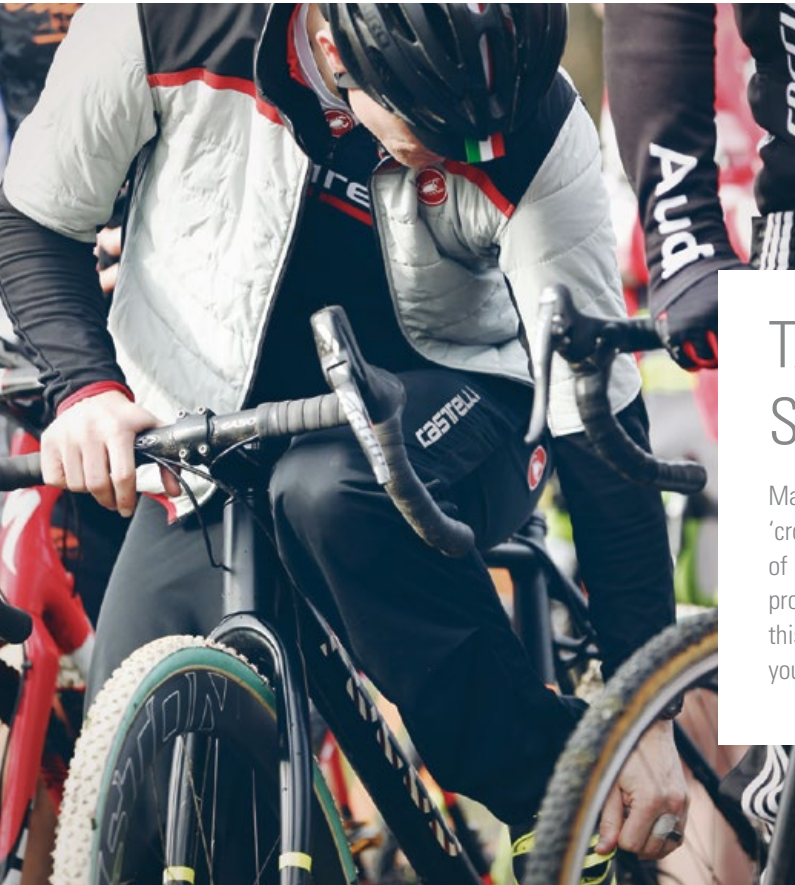

If you don't have a second skinsuit for the following day's race, a muddy cross suit can be a sorry thing to look at when you get back to your hotel room. Fortunately, there is a quick solution that saves you some time. All you have to do is get a mechanic to hit it with a pressure washer after cleaning your bike to get as much mud and/or grass off as possible.

# OPTIMUM OPERATING TEMPERATURE

This jacket is made to bring you quickly up to race temperature by providing extra warmth with PrimaLoft® front insulation. Constructed like a puffy jacket, it lets you keep most of your body heat inside the jacket; the Nano Flex back will let excess heat escape while also giving a high degree of water repellency. With this jacket you can roll up to the line totally warm and take it off just in time for the opening sprint.

## TAKE OFF AT THE START

Made for warming up before your cold and/or wet ‘cross race. This stretchy fabric gives you full freedom of movement for riding the course while completely protecting you from wind, rain, snow and mud. Rock this look up to the line, and then in a couple of seconds you tear away the pant and you’re ready to race.

### CROSS PRERACE JACKET 4515501

- PrimaLoft® 60 insulation on front and sleeves with Toray® 30g water-repellent outer layer
- Nano Flex water-repellent fleece on back
- 3 external rear pockets
- Zippered pocket on front chest
- Warm-up fit—easy on and not too tight

SIZES: **XS-3XL**    WEIGHT: **411g** (Large)    **5°-10°C / 41°-50°F**

003  
SILVER

### CROSS PRERACE PANT 4515502

- High-stretch Torrent 3-layer stretch fabric with 10,000 mm waterproofness and total windproofness
- Full-length button opening for easy removal on the start line
- Narrow leg opening to prevent the fabric from getting caught in the chain
- Reflective logo

SIZES: **XS-3XL**    WEIGHT: **329g** (Large)    **-5°-10°C / 23°-50°F + Rain**

099  
VINTAGE BLACK

### 10M LUNG WARMER 4515503

- Windstopper® 3-layer fabric covers lungs and air passages to help with breathing in cold weather
- Neck is cut high to keep out drafts
- Tear-away Velcro closure makes it easy to take off when the race heats up

SIZES: **UNI**    WEIGHT: **32g** (Large)    **< 5°C / < 41°F**

010  
BLACK

### CW 6.0 CROSS GLOVE 4511539

- High breathability throughout, with vented finger inserts
- Micro-perforated Clarino™ palm with silicone print for grip
- Embossed neoprene back of hand and cuff with Velcro closure

SIZES: **XS-2XL**    WEIGHT: **47g** (Pair)    **8°-18°C / 46°-64°F**

910  
BLACK/RED

MECCANICO RAIN SHELL 4515505

Heavy-duty 3-layer fully waterproof fabric  
Taped seams for total waterproofing  
Reversible construction  
Oversized hood to keep rain off  
Loose fit to comfortably layer over Meccanico Puffy Jacket  
Thigh length for extra rain protection

SIZES: XS-3XL    WEIGHT: 475g (Large)

PRO TIP

MECHANIC  
WATERPROOF SHELL

Mike Heenan  
Pro Mechanic

If you have a habit of ruining your rain jacket by getting it coated with grease and mud splatter while working in the pits, this hard-working shell saves that other rain jacket from a similar fate. Just be sure to do your messy work with the black side out.

MECCANICO PANT 4515508

Durable nylon/Spandex stretch woven water-repellent fabric  
6 pockets  
Center front opening and closure  
Gathered waistband with jacquard elastic  
Knee articulation for ease of movement  
Scorpion rubber patch on tool pocket

SIZES: XS-3XL    WEIGHT: 381g (Large)

RAIN IS PART OF THE RACE

The Meccanico Rain Shell is a durable outer waterproof shell designed for the mechanics in the pits or the ‘cross racer getting ready for the race. It’s cut large to fit over a Meccanico Puffy Jacket, and the oversized hood means you stay dry. And it’s reversible: the black side out gives you a clean stealth look, or you can turn it inside out for maximum visibility for the pit crew.

## WARM FALL DAYS

This piece is designed for your pre-race ritual on warmer days when you don't need our Puffy Jacket. We've gone for understated retro styling with knit cuffs and collar.

### MECCANICO TRACK JACKET 4515506

Full-zip jacket with pockets  
Fleece-lined windproof fabric  
Ribbed cuffs and hem

SIZES: **XS-3XL** WEIGHT: **563g** (Large)

VINTAGE BLACK/SPRINT GREEN

**005**  
TURBULENCE/VINTAGE BLACK

### MECCANICO PUFFY JACKET 4515504

Quilted synthetic-down jacket with fleece lining inserts for extra warmth  
Adjustable hood  
Water-repellent finish  
Zippered front pocket

SIZES: **XS-3XL** WEIGHT: **674g** (Large) < 10°C / < 50°F

**005**  
TURBULENCE/RED

**038**  
VINTAGE BLACK/SPRINT GREEN

## INSULATION FOR BELGIAN WINTER

This insulated puffy jacket is made to keep you warm during your pre-race routine until you start your actual warm-up. And it's ideal for your pit crew or your fan club. Made to be worn under the Meccanico Rain Shell if rain is threatening.

MECCANICO SWEATER 4515509

Soft and lofty mid-layer weight 90%polyester,7%wool,3%lycra in an excellent blend of polyester, wool and lycra for an ideal cold-weather piece  
Water-resistant shoulder panels for added protection  
Full-length zipper  
Handwarmer pockets

SIZES: XS-3XL    WEIGHT: 276g (Large)

038  
VINTAGE BLACK/SPRINT GREEN

005  
TURBULENCE/VINTAGE BLACK

MECCANICO LS ZIP TOP 4515573

Perfect first layer next to your skin  
Made with 48% 18-micron wool / 48% polyester / 4% elastane  
Excellent as a base layer or stand-alone piece  
30 cm zip offers ease of wear and offers venting  
Contrast inner collar

SIZES: XS-3XL    WEIGHT: 180g (Large)

099  
VINTAGE BLACK

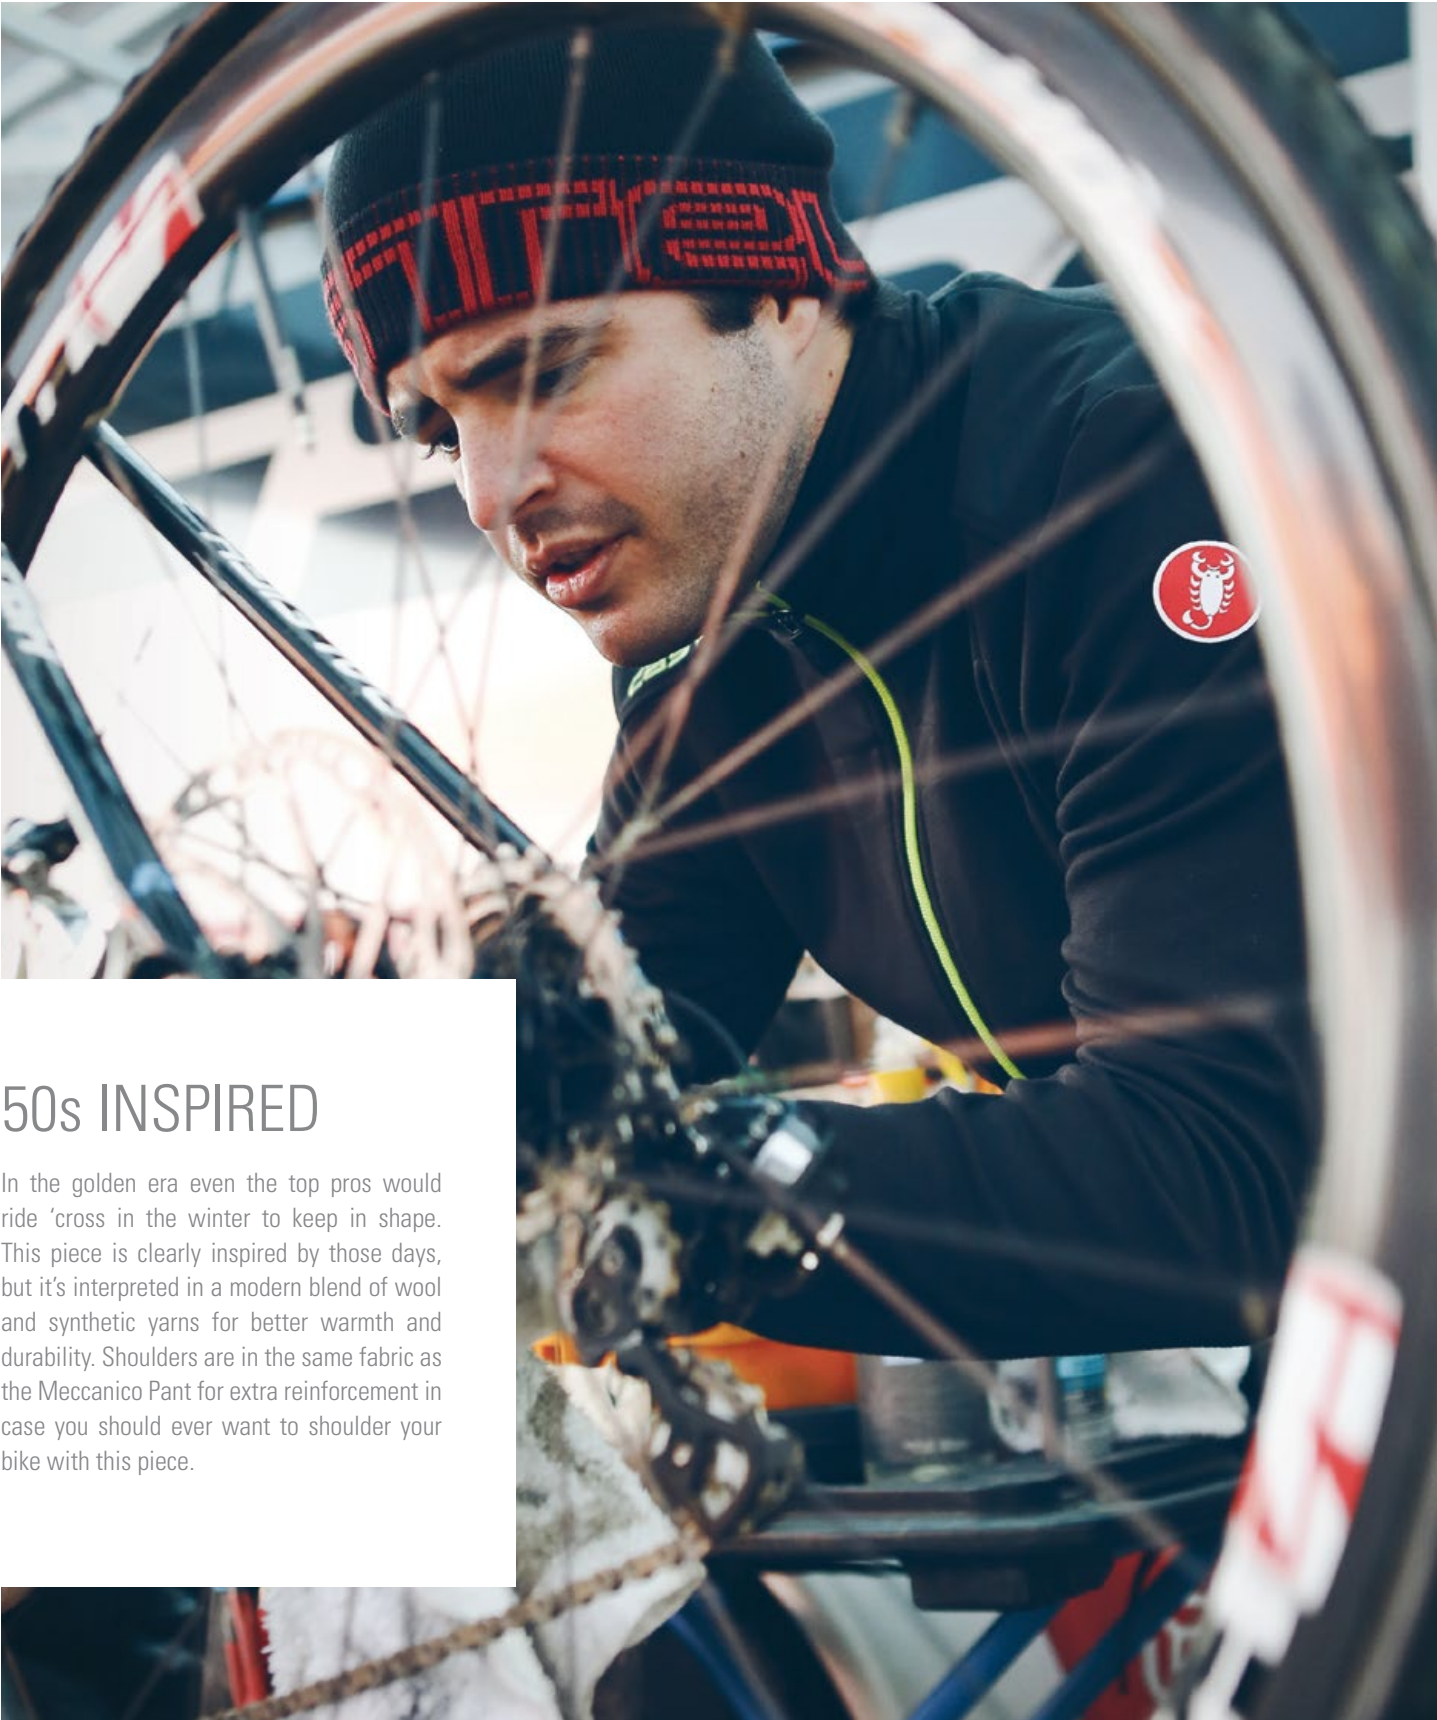

MECCANICO LS TOP 4515507

Heavier-weight cotton blend to allow stretch and mobility in colder temperatures  
Made with 95% cotton / 5% elastane

SIZES: XS-3XL    WEIGHT: 176g (Large)

099  
VINTAGE BLACK

50s INSPIRED

In the golden era even the top pros would ride ‘cross in the winter to keep in shape. This piece is clearly inspired by those days, but it’s interpreted in a modern blend of wool and synthetic yarns for better warmth and durability. Shoulders are in the same fabric as the Meccanico Pant for extra reinforcement in case you should ever want to shoulder your bike with this piece.

ALL-WEATHER PROTECTION

NEVER MISS A DAY  
DUE TO RAIN

TEMPESTA RACE JACKET 4515510

- Exclusive ultralightweight 70 g eVent® fabric
- Stretch water- and windproof inserts at elbow, shoulder, side panel and spray flap
- YKK waterproof Vislon® zipper
- 2 external rear pockets
- Quick-lock drawstring wrist closure with magnetic string keeper
- Silicone elastic waistband
- Reflective trim for 360° visibility
- Fully taped seams for total waterproof construction
- Packs up small to easily store in jersey pocket

SIZES: **S-3XL**    WEIGHT: **201g** (Large)    **6°-20°C / 43°-68°F**

## GABBA-LIKE CONSTRUCTION

The Gabba changed the way you dress for moderate conditions. So we brought Gabba-like construction to our top-of-the-line full-on rain jacket. But we needed some new technology. So we worked with eVent® to develop the lightest ever (and exclusive) version of their PTFE high-breathability membrane. We tested that with Team Garmin-Sharp riders and got unanimous approval.

## TIME TO RETHINK RAIN JACKETS

Cycling rain jackets have until recently really been repurposed mountaineering jackets: bulky construction, mountaineering fabrics, insufficient breathability, terrifying aerodynamics.

The new jacket had to be lighter, more compact to fit in a pocket, and more aero than ever before. So we also developed an extreme stretch version of the fabric to use on the shoulders, elbows and side panels. The resulting jacket fits close to the body and has minimal volume, yet without being too tight and binding when in the tuck position.

We thought through all the details. Like easy opening and closing cuffs. Like the fact that you don't want to pull up the jacket to access your jersey pockets when it's raining. Like making the zipper easy to open and close even though it's completely waterproof. There's so much innovation in this jacket that we think we've just invented another category changer.

**TEMPESTA 3/4 PANT 4515513**

Exclusive eVent® ultralight microfiber main fabric for maximum breathability  
Stretch inserts in Torrent 3-layer fabric that provides extra durability in the seat contact area  
Internal elastic waist with adjustable draw cord  
Internal seam taping for total waterproofness  
Preshaped knee that provides ventilation while keeping rain out  
Reflective Castelli wordmark  
Folds up small to fit in half a pocket

SIZES: **S-3XL**    WEIGHT: **156g** (Large)

**CASTELLI TIP**

**SURPRISING WARMTH ON COLD, DRY DAYS**

This pant over your favorite shorts and leg warmers easily gives another 10° comfort range on dry days. It stretches and breathes enough that you don't really feel it on.

**010**  
BLACK/GREY

**event®**  
waterproof fabric

**UNCONVENTIONAL RAIN PROTECTION**

Maybe you're training for your own Tour de France, or you're riding through the Alps on the trip of a lifetime, and you catch infernal weather conditions. You could bag it, or you could just pull on the Tempesta Pant over your shorts. With our exclusive eVent® and Torrent fabrics, you've got a fully seam-sealed lightweight pant that's going to keep the water at bay.

We made it a 3/4 cut so you'll get airflow coming in from just below the knee to prevent overheating. The Torrent 3-layer stretch fabric is used where you need extra give in the fabric to move with you. You'll want to pull this pant off when it stops raining, so we made it extremely compact so you can stash it in a pocket.

**THE WINNING COMBINATION FOR WET AND COLD**

NANOFLEX 2 BIBSHORT

+

TEMPESTA 3/4 PANT

+

TEMPESTA LEG WARMER  
NANOFLEX LEG WARMER

**WHEEL SPRAY  
NO PROBLEM**

If you're riding without fenders you know that the lower legs get wheel spray from both front and back and are one of the hardest spots to keep dry. So we made the lower part of this leg warmer with waterproof reflective fabric so that the spray will just run off. You wear this warmer with your favorite shorts, underneath the Tempesta 3/4 pant, and OVER your waterproof booties. You get ventilation under the pant, and because the warmer is placed over the bootie, the rain just runs right off. The large reflective area on your moving legs is highly visible for extra safety, and in our testing this piece has become a favorite for night rides.

**TEMPESTA LEG WARMER 4515514**

Made to wear with the Tempesta 3/4 pant  
Can be used as a normal leg warmer for extra water protection and visibility  
Waterproof Reflex lower leg provides water protection and visibility  
Nano Flex upper portion for water repellency should spray come up under the Tempesta pant  
GIRO³ leg gripper  
Ankle zipper positioned at outside of ankle to prevent water entering

SIZES: **S-XL**    WEIGHT: **122g** (Pair)

**010**  
BLACK

**CASTELLI TIP**

**FOR NIGHT RIDES OR COMMUTING**

The reflective lower leg on the Tempesta leg warmers was made to shed wheel spray, but it also provides huge reflective 360° visibility on your moving legs that draws a lot of attention from drivers when you ride at night or in poor-visibility conditions.

TEMPESTA CAP 4515517

Exclusive eVent® ultralight 70 g fabric  
Traditional cycling cap cut with flip-up visor  
Neck flap to prevent water running into your jacket  
Completely waterproof with taped seams  
Reflective trim on back  
Fits under helmet

SIZES: **UNI**     WEIGHT: **28g** (Large)

TEMPESTA HOOD 4515518

Exclusive eVent® ultralight 70 g fabric  
Cut as a detached hood to wear with one of our rain jackets  
Completely waterproof with taped seams  
Nano Flex fabric around the face opening for more breathabil-  
ity and stretch  
Can be worn under the chin or over the face

SIZES: **UNI**     WEIGHT: **52g** (Large)

TEMPESTA GLOVE 4515516

Absolutely waterproof OutDry® technology membrane  
Ultralight waterproof zipper  
Neoprene cuff for easy on/off and secure fit around the ankle  
Open bottom to work with all types of cleats  
Reflective print at the back and center front  
Cordura® sole

SIZES: **S-2XL**     WEIGHT: **168g** (Large)

KEEPS A LOT OF HEAT IN

This cap creates a remarkable barrier from the rain. Our exclusive eVent® ultralight fabric keeps all the rain out but also keeps a lot of heat in, which makes a big difference when you’re riding on colder rainy days. This cap is recommended for colder conditions or moderate-intensity riding.

BLACK/REFLECTIVE SILVER

OutDry®

KEEP EVERYTHING OUT

We created this separate hood to slip over your head and over the collar on your jacket to completely insulate your head and prevent rain from running into your jacket. We cut it thin to fit under a helmet, gave it a visor to keep rain out of your eyes, and made it so you can pull it down under your chin when you warm up or wear it over your face for extra protection. We hope you’ll never need this piece, but if you ride in nasty conditions it’s unequaled.

SLEET READY

This glove was made for conditions like we’ve seen at Sanremo the past two years: mixed rain and snow, and riders with numb hands. We’ve used OutDry® technology to create a totally waterproof barrier but without the water absorbtion of the older glove-liner construction. The membrane is vacuum bonded directly to the outer fabric to create a wind- and waterproof barrier. We’ve lined it with Dry Zone to move moisture away from your hand.

KEEP EVERYTHING OUT

Introducing the first bootie to feature OutDry® technology. We’ve vacuum bonded a seamless membrane to the outer shell to make sure nothing can come in. We’ve built in a neoprene cuff to seal around your ankle and added a waterproof zipper. Use this with our Leg Sleeves for the best possible solution to keep your feet dry.

PURE PERFORMANCE:  
LESS IS MORE

This jacket is an exercise in reducing the rain jacket to the bare minimum. You need a high-performance fabric, so we worked with eVent® to make a lighter version of what they're already supplying to some WorldTour teams. We cut it close to the body to minimize flapping fabric and to improve aerodynamics. Then we taped the seams to make it fully waterproof and gave it a waterproof YKK® zipper. Then we stopped.

BRING IT ON

Don't let the threat of rain keep you from riding—or, even worse, make you ride your trainer. We've used our exceptional high-stretch but lightweight Torrent waterproof fabric and engineered a seam-sealed jacket that easily stuffs in a jersey pocket. It will keep you totally dry from the outside, and the stretch fit makes it comfortable and aero. You will give up some breathability compared to our Tempesta Rain or Pavé jackets, but this is the ideal jacket to bring along when rain threatens.

## GABBA REPRESENTS EVERYTHING WE DO

Products like the Gabba jersey define Castelli: innovation, performance, and creating products that change pro racing and make you more comfortable. The original Gabba has taken the peloton by storm since its introduction in 2010, with most pros buying or begging their way to the must-have piece for cold-weather racing. Based on pro rider needs, created to offer a tangible competitive advantage and developed in a no-compromise pursuit of performance, this jersey represents the essence of who we are.

GABBA 2 4514511

## ONE JACKET, EVERY CONDITION

Take a short-sleeved Gabba and add removable sleeves, and you end up with quite possibly the only jacket you need. Severe cold? Put a thermal jersey underneath and go. Cool conditions? Just use a Flanders base layer and go. Rain? Just put it on and go. Moderate conditions? Zip off the sleeves, throw on some Nano Flex arm warmers and go. This is the ideal travel piece because you're covered for any conditions you find on your next cycling trip.

GABBA 2 LONG SLEEVE 4514513

Fully aero, fully breathable and fully protected

Windstopper® X-Lite Plus fabric for lightweight total wind protection with water-repellent finish

Nano Flex fabric insert under arms

Storm-flap construction at back protects from wheel spray

Silicone gripper on waistband to limit ride-up

Front zippered chest vents

Full-length YKK® Vislon zipper with wind flap

3 rear pockets with drain mesh

SIZES: **S-3XL**    WEIGHT: **319g** (Large)    **6°-15°C / 43°-59°F**

WHAT MAKES THE GABBA GREAT ALSO MAKES A GREAT JACKET

The Gabba is phenomenal because it keeps out the elements while offering excellent breathability and great stretch for a perfect fit. The long-sleeved version is light like a jersey yet protects like a jacket. It's deceptively warm yet doesn't overheat in moderate conditions, and if you get rained on you get the bonus of Gabba protection. This piece has essentially replaced the heavier jackets in our closets except for the coldest conditions.

LIKE WATER OFF A DUCK'S BACK

The Fawesome was designed as your ultimate vest: full Windstopper® front, high collar, aero fit, full-stretch breathable back, Vislon® zipper for easy ventilation adjustment. This piece provides a lot of core body warmth but doesn't let you overheat, thanks to the open back. With our Nano Flex Light fabric on the back, the water-repellent finish means that lighter rain and wheel spray just roll off.

SANREMO 2 THERMOSUIT 4514500

Sorpasso tight lower portion combined with Gabba Long-Sleeve upper portion.

JACKET:

Jacket: Windstopper® X-Lite stretch fabric on upper portion is windproof and splash resistant  
Articulated collar that fits better whether standing or riding  
Long YKK® Vislon zipper with overlapping front opening  
3 rear pockets  
Rear reflective tabs

TIGHT:

Thermoflex and Thermoflex Core2 fabric  
Progetto X<sup>2</sup> Air seat pad for comfort and improved airflow  
GIRO<sup>3</sup> ankle grippers position the tight and seal around shoecover

YKK® Camlock ankle zippers with reflective tape for high visibility

SIZES: **S-3XL**    WEIGHT: **535g** (Large)    **5°-15°C / 37°-59°F**

WINDPROOF AND SPLASH RESISTANT

Windstopper® X-Lite stretch fabric on the upper portion provides total windproofness and great moisture management.

LIGHTER FABRICS, SAME WARMTH

By joining the jacket and the tight together, we prevent cold air from entering, effectively keeping you warmer with lighter-weight fabrics.

THERMOFLEX CORE2 FABRIC

The Thermoflex Core2 fabric keeps you warm and is highly breathable thanks to hollow-core polyester fibers.

GIRO<sup>3</sup> ANKLE GRIPPERS AND REFLECTIVE ZIP COVER TAPE

The addition of silicone-printed Castelli logos on the outside helps keep the cuff securely in place. Reflective tape covers the zip to increase visibility at night.

THREE OF OUR BEST PRODUCTS  
COMBINED INTO ONE

Here's a totally new way of thinking about riding in cold weather. With the product concept of the Sanremo Speedsuit in mind, the Castelli engineers have unveiled a new way to dress warm and light for winter riding. By joining the jacket and the tight together, we prevent cold air from entering, effectively keeping you warmer with lighter-weight fabrics. There are no bib straps to restrict breathing, the seat pad is the same Progetto X<sup>2</sup> Air as the one in your best shorts, and lightweight materials don't feel bulky or restrictive. You essentially have our favorite top, the Gabba Long-Sleeve, with our favorite tight, the Sorpasso—joined Sanremo style. It all adds up to winter comfort.

We've put all our best technologies into this exceptional Thermosuit. An aerodynamic cut, our best seat pad and a mix of lightweight fabrics, including the Windstopper® X-Lite fabric for total windproofness and our warm Thermoflex Core2 fabric. By applying the technical advancement of hollow-core fibers, we've made the tights not only lighter than your normal tights but also warmer—and they keep you drier.

JACKETS

7X(AIR)

We use the best winter membrane fabrics on the market but still find ourselves wanting more breathability. That's why we invented 7x(Air). We start with a fully wind- and waterproof external layer and then quilt it to a fleece inner layer using the trapunto technique. This results in an extremely stretchy wind-resistant fabric, but the stitch holes give just the right amount of air permeability and allow for a continuous exchange of air on the inside of the garment, which carries away moisture much better than fully sealed fabrics.

This actually makes it warmer because there's less unwanted air flowing on the inside of the garment. There must be a downside, right? We definitely wouldn't take this out on a rain day, since rain will come through the quilting stitching, though the fabric is DWR treated and will shed light spray. But it's ideal for your five-hour base fitness rides as well as your one-hour lunchtime world championship rides. Breathability is good.

IT JUST KEEPS GETTING BETTER AND BETTER

In 2013 we invented the 7x(Air) fabric—a proprietary windproof fabric that provides seven times the air permeability of existing membrane fabrics. In 2014 we invented the Alpha jacket with a number of innovative construction techniques to revolutionize the performance and comfort of a winter cycling jacket. In 2015 we bring those two technologies together. You'll thank us.

ALPHA CONSTRUCTION

With the double-layer front you have far greater control over ventilation, and when you're working hardest you can open the external zip to allow airflow to dry the thermal layer. It's hard to imagine until the first time you crest a hill and close the zipper back up and realize you're totally dry. You've never felt anything like it.

Also coming from our Alpha jacket are the innovative wrist and waist closures. The 3D knit fabric looks and feels like neoprene at first glance, but it's a fully breathable woven stretch fabric that dramatically improves these critical areas of the jacket.

ALPHA JACKET 4514502

Articulated collar that fits better whether standing or riding

Windstopper® 150 fabric fabric is windproof and water-resis- tant, with four-way stretch for freedom of movement

Better ventilation, better moisture evaporation thanks to separate insulating layer

Asymmetric external YKK® Vislon zipper slides easily and lays flat

Raw edge waist lays flat and moves with you

Raw edge wrist cuffs lay flat for a perfect interface with gloves

Stretch fabrics with advanced patterning make for excellent close-to-body fit yet accommodates a wide range of body types

Back ventilation

Castelli silicone text gripper at waist keeps the jacket from riding up

Front zippered pocket

3 rear pockets

Zippered rear pocket with reflective webbing

WE STARTED WITH A BLANK SLATE IN DESIGNING OUR MOST INNOVATIVE JACKET EVER

Throw out everything you think you know about cycling jackets and redesign the way a jacket should be made. Or possibly how they'll all be made in a few years when everyone else follows our lead once again. The name Alpha denotes the first in a series. In these products we're introducing several new techniques and fabrics to construct cool and cold weather jackets.

We've focused on two perennial problems with cycling jackets and wind jerseys. First is ventilation. With our latest fabrics we can essentially build a winter jacket that will keep you warm in all but the most extreme conditions with just a base layer underneath. But when you open the front zipper you get a blast of cold air at the top of your chest, while the rest of your body remains too hot.

In Alpha we've detached the insulation layer from the windproof layer so that you can open the windproof layer to let air in to ventilate and help evaporate moisture. Riding these pieces shows how effective it is at regulating temperature and comfort while helping to keep you drier.

The second focus area is all the openings. At the waist we have a new fabric and construction that lays completely flat, is streamlined for aerodynamics, yet when you drop into the riding position it follows your body without binding or billowing. At the wrists we have a new flat raw-edge construction that interfaces perfectly with our gloves to keep drafts out and to improve comfort. At the collar we have a new articulated construction that follows the bends in your neck whether you're standing or riding in the lowest aero position.

ESPRESSO 3 JACKET 4514504

- Windstopper® X-Fast fabric is windproof and water-resistant, with four-way stretch for freedom of movement
- Anatomic form-fit cut for cycling position
- Floating shoulder construction for excellent flexibility when fully stretched out
- Phone pocket plus cable port
- Front zippered chest vents
- Flip-up Thermoflex collar
- Elastic band on back keeps jacket from riding up
- Wrist zips for extra ventilation and easy closure around gloves
- Full-length YKK® Camlock zipper
- 3 rear pockets
- Rear reflective tabs

SIZES: **S-3XL**    WEIGHT: **555g** (Large)    **0°-12°C / 32°-53°F**

In designing the Espresso 3, we paid attention to even the smallest details to create the ideal blend of performance, fit and style. Windstopper® fabric keeps you protected from wind and water while allowing for excellent breathability. A soft mesh lining is essential for insulation and adds extra comfort. Venting is enhanced by two vertical zippers down the front of the jacket and two more zippers extending up along the wrists. There's a phone pocket on the chest and three rear pockets big enough to hold spare tubes, gloves and food.

GO WITHOUT

"Without" is the translation of this jacket's name from Italian. We wanted to create a jacket with essential protection, useful storage, perfect race fit and nothing else. This is the jacket for long base rides in the winter, even down to arctic conditions. We started from our pro team jacket, used the same Windstopper® X-Fast fabric for total windproofness, high-loft fleece for warmth, and good rain protection and excellent breathability. You have a phone pocket on the chest and a zippered money/key pocket on the back, and an easy-sliding YKK® Camlock zipper. This is the high-performance go-to jacket for your rides in harsh winter conditions.

MORTIROLO 3 JACKET 4514506

JUST RIGHT

It's a vicious circle. You get a warm jacket, then sweat when you ride, get wet and cold, then get an even warmer jacket. Many cyclists get cold because they're overdressed or don't have enough airflow to keep them dry. That's what makes the Mortirolo ideal for so many riders. Our Windstopper® X-Fast on the front and sleeves keeps the cold at bay, while the Warmer back allows massive breathability. You'll stay drier and, at higher intensity levels, possibly warmer than with a full-protection jacket. It's no wonder this is a top seller every year.

# MORTIROLO ALL NIGHT LONG

Our top-selling Mortirolo now comes in the Reflex version that places huge reflective panels over the shoulders and at the lower back to provide 360° reflectivity. With the extra visibility you can train longer in the evening or use this as your go-to piece for night rides. Plus it looks really cool.

## MORTIROLO REFLEX JACKET 4515520

# IT'S OUR ALTER EGO

We pour a lot of energy into our groundbreaking innovations like the Alpha jacket. It's part of our constant striving to make riding faster, more fun and more comfortable. But there's another side of us that appreciates the simple perfection of a perfectly constructed garment with just the right fabrics, fit, design and components, where everything just kind of disappears. That's the Passo Giau jacket. Designed to fit your body. Nothing superfluous.

## PASSO GIAU JACKET 4515521

- Body mapping to bring the right fabrics to each part of the body
- Windstopper® X-Fast fabric on upper chest and shoulders
- Windstopper® X-Mid fabric on sleeves and lower chest
- Back in Warmer for excellent breathability
- YKK® Camlock zipper
- Jacquard waist elastic
- 3 external rear pockets
- Anatomic collar for extra comfort in cycling position
- Reflective tabs

SIZES: **S-3XL**    WEIGHT: **321g** (Large)    **6°-15°C / 43°-59°F**

## PRO TIP

### PUT RIDING CLOTHES IN THE DRYER BEFORE HEADING OUT

*Theo Bos*  
*(Team MTN-Qhubeka)*

A little trick that I use before heading out into frigid winter temperatures is putting my cycling clothes in the dryer right before rolling out. You'll get this warm and cozy feeling at the beginning of your ride, and by the time your body generates its own heat, the heat from your warm clothing will have dissipated.

FREE 3 JACKET 4515522

- Windstopper® X-Fast fabric for full wind protection
- Silicone gripper at waist keeps jacket from riding up
- Form-fit cut for cycling position
- Full-length YKK® Vislon zipper
- Flip-up Thermoflex collar for maximum protection
- Internal Thermoflex wrist cuffs seal out cold
- Side panels in Thermoflex for extra breathability
- 3 external rear pockets
- Rear reflective tabs keep you visible in low-light conditions

SIZES: S-3XL    WEIGHT: 480g (Large)    0°-10°C / 32°-50°F

FREE 3 VEST 4515524

- Windstopper® X-Fast fabric on front and shoulders
- Warmer fleece fabric on back provides warmth with high breathability
- 3 external rear pockets
- YKK Vislon® zipper
- Reflective tabs at back for visibility

SIZES: S-3XL    WEIGHT: 261g (Large)    10°-18°C / 50°-64°F

WARM TO THE CORE

This vest uses our warmest thermal fabrics and was designed to layer over our Free thermal long-sleeve jersey to provide the highest level of core insulation. For high-intensity rides in cool conditions or low-intensity base fitness rides in milder conditions, this layering system allows your body to let off excess heat through your arms while always keeping your core warm. It just works.

# IT'S TIME TO GET YOUR MATCHING WINTER KIT

You're already reaping the benefits of the Free summer kit, and now it's time to match the colors with the perfect cold-weather jacket to keep you off the rollers this winter. We want you to be as comfortable as possible while you're putting in those base miles over the winter and early spring. That's why we cut this jacket to fit perfectly in the riding position, made it fully windproof and water resistant, and gave it details like a high collar and side panels in Thermoflex for extra breathability. The YKK® Vislon zipper is easy to open and close with a gloved hand, and the three open rear pockets are easy to access. This is the same model we supply to Team Cannondale-Garmin in pro team graphics.

# NOT EXACTLY WHAT WE GIVE TO THE PROS

The Team Cannondale-Garmin and Team MTN-Qhubeka pros get our full Windstopper® jacket, and they say they like it. But they also have 5% body fat. Or less. Some of the rest of us get too hot riding in the pro jackets. So we made this one with our Warmer fabric on the back panel. This allows for more air exchange and lets off a lot of heat, making this ideal for rides in midler conditions, although we happily take it down to 6°-7°. This is an ideal jacket for fall and spring in colder climates, or a full winter piece if you're lucky enough to live where it doesn't get that cold.

## SEGNO JACKET 4515523

- Windstopper® X-Fast fabric on front and sleeves
- Warmer fleece fabric on the back for additional breathability
- Silicone gripper at waist keeps jacket from riding up
- Anatomic form-fit cut for cycling position
- Full-length YKK® Vislon zipper
- Flip-up Thermoflex Collar
- Side panels in Thermoflex for extra breathability
- 3 external rear pockets
- Rear reflective tabs keep you visible in low-light conditions

SIZES: **S-3XL**    WEIGHT: **440g** (Large)    **6°-15°C / 43°-59°F**

## ISTERICO VEST 4511504

- Windstopper® X-Fast stretch fabric is windproof and water resistant
- Warmer fabric on back for temperature regulation
- Anatomic form-fit cut for cycling position
- Front zippered chest pocket
- Elastic band on back keeps vest from riding up
- Full-length YKK® Camlock zipper
- 3 rear pockets
- Rear reflective tabs and trim at hem

SIZES: **S-3XL**    WEIGHT: **230g** (Large)    **8°-16°C / 43°-60°F**

## PERFECT FIT WITH OUR THERMAL JERSEYS

The Isterico Vest is designed to keep your core warm during long off-season training rides. The windproof and water-resistant Windstopper® X-Fast fabric on the front and sides will protect you from the elements, while the Warmer fabric on the back will give you maximum temperature regulation. Isterico is cut to provide an anatomic fit, with an elastic band on the back of the waist to keep it from riding up. A zippered front pocket is perfect for cell phone or keys, while three traditional rear pockets will take care of the inner tubes and food. Rear reflective tabs and trim at the hem provide increased visibility in low-light conditions.

SOTTILE DUE JACKET 4513086

Sleek, performance-fit, lightweight packable jacket  
Fits in any jersey pocket without weighing you down  
Waterproof, wind resistant and breathable fabric  
Mesh at underarm for added breathability  
Full-length zipper  
Zipper opening at back for access to jersey pockets  
Rear reflective tabs  
100% polyester

SIZES: **S-3XL**    WEIGHT: **91g** (Large)    **10°-16°C / 57°-71°F**

059  
DRIVE BLUE

NOT JUST FOR THE PROS

The Sottile Due jacket is made of lightweight, semitransparent material and folds up to next to nothing. This is a great race piece due to its light weight and packability, and your team jersey and race number will also be visible through the transparent fabric. Unlike the race capes of old, which were basically plastic, this modern version uses a light, stretchy fabric with underarm mesh inserts to aid breathability and make it fit comfortably. Then we made all the details just right, from the high collar to the zippered opening for easy access to a jersey pocket.

CORE BARRIER

We consider a vest to be a vital piece of equipment, and we recognize the importance of getting it right. The Sottile Due Vest keeps the rain at bay and provides total windproofness, but it still offers some stretch and breathability. Best of all, it packs down to next to nothing so you can take it along on almost every ride.

VELO JACKET 4514026

ForceField micro ripstop fabric is fully windproof and offers DWR rain protection  
Mesh-lined collar that becomes stuff sack  
Covered ventilation openings on sleeves and back  
Reflective Castelli wordmark logo  
Reflective back tabs  
Cut long for lower-body splash protection

SIZES: **S-3XL**    WEIGHT: **91g** (Large)    **12°-16°C / 50°-61°F**

NEVER GET CAUGHT OUT

We’ve engineered an extremely high amount of protection into a minimum-sized package. Using a 30 g/m2 water-repellent and windproof fabric, we’ve created a jacket that disappears into half a jersey pocket when not in use, yet provides wind and rain protection when needed. Fit is predictably Castelli: close to body to minimize flapping fabrics. Serious equipment for unpredictable conditions.

# REDEFINING WHAT A JERSEY CAN DO

We love the feel of riding in a thermal jersey in the right conditions: you're cozy and warm, have total freedom of movement, stay drier than with a jacket, and have no extra fabric flapping in the wind. With the Alpha Wind Jersey we've extended that feeling to about 10 degrees colder and given you the Alpha ventilation system that prevents overheating better than ever. We've given this jersey a Nano Warm back for total breathability yet with nanotechnology rain protection, and flat wrists and waist lifted straight from the Alpha Jacket.

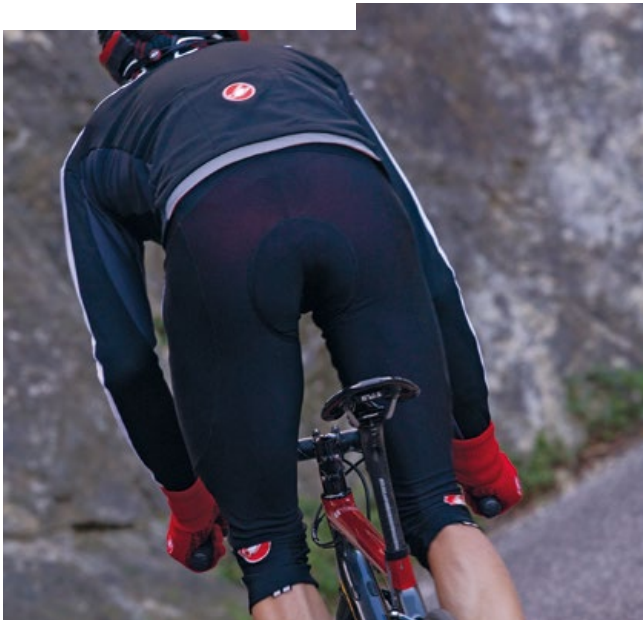

# PRO-ISSUE TRAINING GEAR

This is the same piece the Team Cannondale-Garmin team is using for winter training, and you'll be reaching for it again and again too. We gave it full front wind protection but cut it close to the body like a jersey and gave it a full thermal breathable back so you don't overheat. It falls in that in-between land between a jersey and a jacket. It keeps you nearly as warm as a jacket, yet doesn't let you overheat and get sweaty like a jacket. And it doesn't feel bulky like a jacket. It will make you want to do intervals in January.

## ROSSO CORSA

## PRO TIP

### IDEAL FOR INTENSIVE TRAINING IN COLD CONDITIONS

Daniel Martin  
 (Team Cannondale-Garmin)

This jersey over a warm base layer (Flanders Warm) is actually ideal for intensive intervals or max-level training in temperatures approaching freezing. It keeps the wind off the front, but you stay drier and therefore warmer than with a heavier jacket.

SECONDO STRATO JERSEY FZ 4515526

Strada Termico brushed-fleece 100% polyester base fabric  
Stretch woven overlays on upper chest and shoulders cut wind while providing excellent breathability

RANGE EXTENDER

Though we strive to make the best jackets in the world, we resist pulling out our jackets in the fall until absolutely necessary. We like the breathability and freedom of movement that you get in a thermal jersey. With the Secondo Strato Jersey we’ve just extended the temperature range you can cover before donning your jacket in the fall. We’ve overlaid the upper chest and shoulders with our stretch woven fabric that essentially cuts most of the wind while still allowing a lot of air exchange and evaporation.

SECONDO STRATO REFLEX JERSEY FZ

CLASSICA THERMO JERSEY FZ

CLASSIC LINES

This is that great piece for early fall days when you first need some extra warmth, or for layering over our Flanders Warm base layer with a Fawesome Vest. Its classic lines make it look great, and the Strada Termico fabric will keep you warm. Important details are all there, like the YKK® Camlock zip and the key/money zippered pocket on the back with reflective taping.

CLASSICA THERMO JERSEY FZ 4514517

SIZES: S-3XL    WEIGHT: 270g (Large)    15°-20°C / 59°-68°F

IT'S EVEN RACEABLE

We re-engineered the Garmin thermal jersey for 2013 and surprised ourselves a bit. The Garmin riders raved about the jersey, and we even picked it out being used in races last spring. It's a PERFECTION SIMPLIFIED kind of garment: Warmer fabric on the body to keep your core warm, Warmer X-Stretch on the sleeves to eliminate flapping fabric, a YKK® Vislon zipper for easy up/down. Just one ride and it'll change your idea of how good a thermal jersey can be.

CASTELLI TIP

STAY WARM WITHOUT OVERHEATING

A full windproof jacket is too warm for most pros in all but the most extreme conditions. Try using a warm short-sleeve base layer and arm warmers under the Puro jersey, and a Fawesome vest on top. The two layers keep your arms much warmer by preventing wind from reaching the skin, yet sweat is carried away instantly.

SEGNU JERSEY FZ 4515530

DRESS LIKE A PRO

Our printed thermal jerseys are much more than just the colorful graphic that you notice at first. We’ve worked hard with our pro riders to give them the best thermal jersey ever, and this group of graphic jerseys features the same cut and fabrics we use for the pros. Every stitch, every fabric and every millimeter of the pattern has been obsessed over to make this deceptively simple garment approach perfection.

## ONCE UPON A TIME

Before Castelli was called Castelli the company was known as Vittore Gianni and amassed over a century of knowledge in wool clothing. We know that wool isn't ideal for every application, but for some special applications it's hard to beat. We've developed this jersey with a 74/26 polyester/wool mix, with the polyester on the inside to help move moisture away. You'll stay dry and warm with a very light weight garment, yet it's easy to care for. The retro styling is there as a reminder that you can't fake heritage.

UNAVOLTA JERSEY FZ 4514523

Retro styling on retro wool fabric  
Lightly brushed performance wool/polyester fabric wicks moisture to outside of fabric  
Sublimation-printed graphic

## TIGHTS AND KNICKERS

THE BEST TIGHT WE'VE EVER MADE

ROSSO CORSA

PROGETTO X<sup>2</sup>

SORPASSO BIBTIGHT 4510510

Thermoflex Core2 fabric front and knee areas for extra protection  
Thermoflex back, lower legs and thighs for maximum stretch  
GIRO++ seamless straps on bib  
GIRO<sup>3</sup> ankle grippers position the tight and seal around shoecover  
YKK® Camlock ankle zippers with reflective tape for high visibility  
Progetto X<sup>2</sup> Air seat pad for comfort and improved airflow

SIZES: S-3XL WEIGHT: 260g (Large) 0°-15°C / 32°-59°F

This is it: the tight that is getting glowing reviews from magazine testers all over the world and is also the favorite among the Castelli test crew. The comments that keep coming up are the great fit along with exceptional comfort down to very cold temperatures or even when the thermometer rises. The secret to the great fit is the mixture of Thermoflex Core2 along with our standard Thermoflex, which lets us create just enough stretch but with enough support to keep everything in place.

The wide temperature range is thanks to the inner layer of Thermoflex Cure Due, with its hollow-core polyester for great moisture management and insulation. All that plus the Progetto X<sup>2</sup> Air seat pad, GIRO++ bib straps and Camlock ankle zips with reflective overlays. It will get glowing reviews from you too.

SORPASSO BIBKNICKER 4510511

Thermoflex Core2 fabric front and knee areas for extra protection  
Thermoflex back, lower legs and thighs for maximum stretch  
GIRO++ seamless straps on bib

# THINK OF IT AS THE SORPASSO FOR THE FAR NORTH

The Sorpasso is the ideal tight for a wide range of winter riding conditions, but some areas are just too cold for the Sorpasso. So with the with the Sorpasso Wind we've taken everything you love about the Sorpasso and added our thick fleecy Windstopper® X-Fast fabric to the knee and thigh to extend the comfort range down to well below freezing.

But we've kept the Thermoflex Core2 in the front around the seat-pad area because we love the way this fabric offers good wind protection and excellent warmth and wicking, yet allows us to make the tight fit perfectly. For really extreme riding when wind protection for the sensitive areas is a must, see the Polare 2 wind tight.

PERFECTION SIMPLIFIED

This is one of the simplest products in the Castelli line, but every detail has been obsessed over, to perfection. It has just four panels, with the front two in Thermoflex Core2 to keep you a little warmer on the front, and the back two in standard Thermoflex to give a perfect fit.

## ANATOMICAL CUT

The seams are placed closer to the back for extra warmth, and we even manage to provide an anatomical cut. The seams are flat for extra comfort, and the zippered ankles get some reflective taping for added visibility on the bibtight. The Meno products shows perfection simplified at its best.

### MENO BIBTIGHT 4514528

Thermoflex Core2 front panels for warmth and moisture management  
 Thermoflex back panels for extra stretch  
 KISS Air pad for all-day comfort

### PERFECTION SIMPLIFIED... AND WINDPROOF

The Meno Bibtight is one of the standout products of our collection. We know you'll love it and want more, so here's the windproof version of it. In the spirit of obsessing over the details, we're introducing a new AirFlex Thermo fabric that provides high four-way stretch with total windproofness and a fleecy inside to keep you warm.

TRAIN THROUGH ANYTHING

We initially developed our Nano Flex tights to help you get through the occasional rainy day of training. But you asked for more, so here it is: the extreme-duty Nano Flex bibtight. By putting an extra layer over the thighs, knees and bum we're able to significantly increase the rain protection while also blocking a bit more wind. We've made the lower inner leg completely waterproof, since this was usually the first area to soak through with our Nano Flex tights. And because these tights are going to see heavier use, we've also upgraded the seat pad to the Progetto X² Air, so you're ready for long rides with a high probability of rain.

CASTELLI TIP

BREAK THE RULES

One of the cardinal rules of dressing for cycling is that your tights or leg warmers go inside your booties. Nano Flex changes that. When it's raining, put the tights or warmers over the booties to shed rain to the outside of the bootie and help keep your feet dry.

POLARE 2 BIBTIGHT 4513523

Full Windstopper® X-Fast front for total wind protection  
Thermoflex Core2 back for extra warmth with brushed fleece inside  
KISS Air seat pad gives great cushioning without excessive bulk  
Ankle zips with reflective detailing

SIZES: S-3XL    WEIGHT: 350g (Large)    -5°-4°C / 23°-39°F

WINDPROOF AND  
SPLASH RESISTANT

Windstopper® X-Fast stretch fabric on the upper portion provides total windproofness and great moisture management.

REFLECTIVE  
DETAILING

710  
BLACK/REFLEX

THERMOFLEX CORE2 FABRIC

The Thermoflex Core2 fabric keeps you warm and is highly breathable thanks to hollow-core polyester fibers.

ANKLE GRIPPERS  
AND REFLECTIVE ZIP COVER  
TAPE

Reflective tape covers the zip to increase visibility at night.

OUR WARMEST TIGHT

This is our warmest tight for tough guys who don't let a little cold keep them indoors. Our warmest Windstopper® fabric covers the entire front of the tight and even wraps around the sides of the thighs for added protection.

Thermoflex on the back lets us build in the renowned Castelli fit. We've kept the bib straps to a minimum so that you can layer your upper body exactly as you wish, without an unwanted thermal layer covering your stomach.

# BASELAYERS

ROSSO CORSA

FLANDERS WARM LS 4514531  
FLANDERS WARM ZIP 4514532

SottoZero Fleece multi-denier 100% polyester fabric  
Flat-lock stitching  
Mesh armpit insert  
Flat hem tucks away in tights  
High collar with Camlock zipper (l)

SIZES: XS-2XL WEIGHT: 116g (Large) -5°-8°C / 23°-46°F

## BLUSTERY WEATHER NO PROBLEM

This product was made for the conditions of Flanders in February. Or basically any month between September and May. High-loft fleece on the inside provides warmth to spare, and you'll love the softness on your skin with the excellent moisture management of this 100% multi-denier fabric. It's stretchy for a perfect fit, and the flat-lock seams add an extra touch of quality.

FLANDERS BASELAYER COLLECTION

Multidenier 100% polyester 3D-structure rib-knit main body for mechanical wicking and exceptional fit  
Perforated 100% polyester mesh under arms for additional cooling  
Multidenier 100% polyester 4-way stretch sleeves for great wicking and fit

4-needle flat-lock stitching lies flat for total comfort  
Mock turtle neck on long-sleeve model, crew neck on short-sleeve version  
Flat finish bottom  
Longer back stays tucked in

LOOK LIKE A FLANDERS HARD MAN,  
STAY WARM INSIDE

The guys who race in Flanders in the spring are cycling’s tough men. That’s the inspiration behind the Flanders base layers—letting you get about business. This windproof version lets you ride in surprisingly cold weather with just a jersey. You’ll look tough from the outside but stay comfortable inside. We’ve actually kept the layer of our multidenier 100% polyester channeled fabric on the front since it acts like a reservoir to prevent the membrane feeling clammy next to your skin.

PRO ISSUE SS 4515537

100% polyester 3D mesh fabric  
Reduced seaming at shoulders for extra comfort  
Wider collar to fit under aero jerseys  
Flat waist hem to lie flat in shorts

SIZES: XS-2XL    WEIGHT: 48g (Large)    15°-25°C / 59°-77°F

001  
WHITE

DRY IS GOOD

This is the piece our pros requested for those in-between conditions where the Flanders is too warm and the Core Mesh is too cool, like Spain in February or Belgium in April. You're not looking for warmth from your base layer, just something to move the moisture away from your body and help your race jersey perform. Our 3D mesh fabric creates dead air space next to your skin, while the polyester capillary action moves sweat away.

PRO ISSUE SLEEVELESS 4515538

100% polyester 3D mesh fabric  
Reduced seaming at shoulders for extra comfort  
Wider collar to fit under aero jerseys  
Flat waist hem to lie flat in shorts

## TEMPESTA GLOVE 4515516

4-way stretch water-resistant Nylon 66/Elastane 95/5% DWR  
Absolutely waterproof OutDry® technologymembrane  
Dry Zone lining manages moisture with 1-way moisture movement  
Neoprene cuff for easy on/off and secure fit  
Microsuede thumb panel  
Reflective detailing

SIZES: **XS-2XL**    WEIGHT: **108g** (Large)    **5°-11°C / 41°-52°F**

**010**  
BLACK/REFLECTIVE SILVER/TURBULENCE

## SLEET READY

This glove was made for conditions like we've seen at Sanremo the past two years: mixed rain and snow, and riders with numb hands. We've used OutDry® technology to create a totally waterproof barrier but without the water absorbtion of the older glove-liner construction. The membrane is vacuum bonded directly to the outer fabric to create a wind- and waterproof barrier. We've lined it with Dry Zone to move moisture away from your hand.

## ROSSO CORSA

## ESTREMO GLOVE 4512539

Our Warmest cold-weather glove  
Windstopper® X-Fast fabric on hand for total wind protection  
Fleece liner for cold protection  
Embossed tone-on-tone scorpion logo on back  
Silicone print on palm for a better grip  
High Neoprene cuff with Velcro closure  
Pre-curved construction  
Microsuede thumb panel

SIZES: **XS-2XL**    WEIGHT: **165g** (Pair)    **-5°-5°C / 23°-40°F**

**010**  
BLACK

## OUR WARMEST COLD-WEATHER GLOVE

The Estremo Glove was designed for the coldest conditions—ideal for low temperatures and bad weather. Constructed from a windproof Windstopper® X-Fast fabric combined with a fleecy material on the palm, covered with silicone texture for a better grip and durability. Proof that we take harsh winter riding seriously.

## 4.3.1 GLOVE 4515540

Converts from a glove to a mitten, or leave the index finger out and cover 3 fingers for versatility and cold-weather protection  
Fold-away windproof finger cover that can be brought out when needed  
Velcro closure to secure fit at wrist  
Polartec® PowerStretch fleece liner for warmth and comfort  
Reflective print on back of hand  
Microsuede thumb panel

SIZES: **XS-2XL**    WEIGHT: **98g** (Pair)    **0°-10°C / 32°-50°F**

**051**  
BLACK/TURBULENCE

## ALL OR NOTHING, OR SOMETHING IN BETWEEN

We made our "lobster" glove much more flexible. You can use it as a standard glove when it's not that cold out, or pull out the finger flap to add extra warmth to 4 fingers like a mitten, or just tuck in 3 fingers to keep your index finger free for shifting and braking duty. Genius.

CHIRO 3 GLOVE

A perennial favorite with Castelli staff. The Chiro is our medium weight glove that keeps the wind and cold out, yet with outstanding breathability. We’ve built it with a slim fit so it doesn’t feel too bulky, and with a palm that maximizes grip and feel on the bar.

LEGGENDA GLOVE

We created the Leggenda to be your favorite winter glove. It’s not the warmest glove in Castelli, it’s not totally waterproof, it doesn’t have the most padding. But it’s just right in so many ways. It’s the right weight for most of your winter riding rather than for extreme cold. It has a wind proof, water repelling outside matched with an inner lining in PolarTec Power Stretch that provides excellent warmth with excellent wicking and will last nearly forever.

NANO XT GLOVE 4514534

Minimalist construction with just enough protection for cool conditions  
Reflective graphic for visibility  
Stretch wrist closure for easy on/off  
Wind and water resistant

PRO TIP

COVER YOUR HANDS WITH THE RIGHT GLOVE

Lasse-Norman Hansen  
(Team Cannondale-Garmin)

Training in Denmark throughout the winter months can be tough. With cold, rain, sleet and snow, it takes three pairs of gloves to get through the winter. A fully thermal windproof and breathable glove with a wide temperature range is ideal for cold days and even with some light rain.

For riding in proper rain, a truly waterproof glove like the Tempesta is essential. There's little chance of cold hands, but then I usually add an inner glove for extra warmth. For mild winter days, I use the either the lightweight Prima or Lightness glove. The Prima is my all-time favorite for early spring races; its minimum bulk and silicone grip on the palm gives you plenty of control over the brakes and feel on the handlebar.

DILUVIO GLOVE 4514536

Neoprene insulation to keep your hands nice and warm  
No-slip gripper on palm  
Extended neoprene cuff to keep the wind and rain out

SIZES: **SM/LX/2XL**    WEIGHT: **97g** (Pair)    **4°-15°C / 39°-59°F**

DILUVIO SHOECOVER 4514537

Allover waterproof high-stretch neoprene  
Slip-on construction with Velcro closure  
Waterproof seam sealing  
Minimal bulk  
Reflective detailing on back  
Warm and comfortable in the rain

SIZES: **SM/LX/2XL**    WEIGHT: **136g** (Pair)  
**5°-16°C / 41°-60°F**

DILUVIO SHOECOVER 16 4514538

Allover waterproof high-stretch neoprene  
Waterproof seam sealing  
Reflective detailing on back  
16cm cuff with YKK® zipper  
Reflective detailing on back  
Extra protection - so cozy you'll almost hope for rain

SIZES: **SM/LX/2XL**    WEIGHT: **146g** (Pair)  
**0°-12°C / 32°-53°F**

DILUVIO ALL-ROAD SHOECOVER 4513534

100% neoprene, the ideal insulation to keep your feet warm and dry  
Opening at bottom works with a road bike or mountain bike shoe  
O-ring construction at top opening for added protection from wet weather  
16cm cuff  
Reflective detailing on back

SIZES: **SM/LX/2XL**    WEIGHT: **148g** (Pair)  
**3-15°C / 35°-59°F**

KEEP IT SIMPLE

We made this shoecover simple intentionally. It's a quick piece to slip on and then close with a Velcro tab, and the neoprene keeps your feet protected from wind and rain. The seams are sealed just like a wet suit, and there's a bit of reflectivity on the back just in case.

PRO TIP

SAVE TIME IN GETTING OUT THE DOOR

Gerald Ciolek  
(Team MTN-Qhubeka)

If the roads aren’t too wet and dirty, you can get a couple of rides from your booties between washes. When you finish the ride, open the zip and peel the booties back just far enough to loosen up your shoes.

TEMPESTA SHOECOVER 4515515

- 4-way stretch water-repellent nylon outer shell
- Absolutely waterproof OutDry® technology membrane
- Ultralight waterproof zipper
- Neoprene cuff for easy on/off and secure fit around the ankle
- Open bottom to work with all types of cleats
- Reflective print at the back and center front
- Cordura® sole

SIZES: **S-2XL**    WEIGHT: **168g** (Large)    **6°-12°C / 43°-53°F**

010  
BLACK/REFELCTIVE SILVER

KEEP EVERYTHING OUT

Introducing the first bootie to feature OutDry® technology. We’ve vacuum bonded a seamless membrane to the outer shell to make sure nothing can come in. We’ve built in a neoprene cuff to seal around your ankle and added a waterproof zipper. Use this with our Leg Sleeves for the best possible solution to keep your feet dry.

DIFESA SHOECOVER 4515544

- Fully aero, fully breathable and fully protected
- Windstopper® X-Lite Plus fabric for lightweight total wind protection with water-repellent finish
- Wrap fit for ultimate movement and comfort
- Pull tab at back for easy pull-on
- Cordura® sole

SIZES: **S-2XL**    WEIGHT: **94g** (Pair)    **2°-12°C / 36°-54°F**

FOUL WEATHER RACE EQUIPMENT

Just like our other Foul Weather Race Equipment pieces, this bootie will be ideal in dry conditions but really shines in racing in bad weather. It’s highly water resistant, but also highly breathable so will be the first to dry when the rain lets up. The wrap construction makes it easy to get on and off, and helps to reduce rain coming through seams.

ULTRA SHOECOVER 4512555

- Windproof protection from cold temperatures
  - Windstopper® X-Fast fabric is windproof and splash resistant
  - Waterproof zipper on back to keep water out
  - Reflective detailing on back
- SIZES: **S-2XL**    WEIGHT: **123g** (Pair)    **0°-10°C / 32°-50°F**

NARCISISTA SHOECOVER 4509524

- Windproof protection from cold temperatures
- Stratolight fabric with neoprene inserts for warmth and flexibility
- Welded waterproof zipper on side to keep water out
- Reflective detailing on back
- Plissé insert

SURPRISINGLY USEFUL

It’s aero for time trials. It’s windproof for cool days. The fabric is waterproof so it keeps road splash at bay. We like this product for all but truly cold conditions because it’s good at everything.

CORSA SHOECOVER 4515545

Ultra Fleece water- and windproof fabric  
Exceptionally stretchy for perfect fit  
Neoprene cuff to keep water out  
YKK® zipper  
Kevlar® fabric sole

SIZES: **S-2XL**    WEIGHT: **74g** (Pair)    **6°-14°C / 43°-57°F**

REVERSE ENGINEERING

Usually we develop products for the pros then bring it to the Castelli collection and then to our Servizio Corse custom team program. This bootie was designed first as a custom team bootie that allows maximum space for team graphics, but it was so good we’re bringing it to the Castelli collection. Our new ultra stretch ultra fleece fabric keeps your feet very warm and fits great. A neoprene cuff keeps the water out while the Kevlar sole makes them durable.

REFLEX SHOECOVER 4515546

Reflective, waterproof and windproof protection from cold temperatures  
High stretch all-over reflective material for high visibility and flexibility  
Ultra-light waterproof zipper to keep water out  
Seamed sealed for waterproof front  
Cordura sole  
Castelli wordmark heat transfer on outside

SIZES: **S-2XL**    WEIGHT: **118g** (Pair)    **6°-12°C / 43°-53°F**

BE SAFE AND BE SEEN

Our allover-reflective Reflex Shoecover is waterproof and seam sealed to keep the wet out. The fabric is breathable and has an excellent stretch for a sleek and form-fitting fit. The neoprene cuff offers a snug fit around the ankle, whether you wear it over or under your tights.

TOE THINGY 4512544

Wind and water proof Neoprene protection for your toes  
Rugged, rubberized sole with openings for cleats  
Eye-catching Scorpion logo and Castelli lettering on top  
Can be worn on its own or as a layer between your shoe and shoecover

SIZES: **UNI**    WEIGHT: **56g** (Pair)    **10°-18°C / 50°-64°F**

PRO TIP

**KEEPING FEET WARM**  
*Matej Mohoric*  
*(Team Cannondale-Garmin)*

If my feet and hands are still freezing on rides despite heavyweight wool socks and shoecovers, adding the Castelli Toe Thingy on the tip of my shoe, under the shoecover, will add extra warmth.

ROSSO CORSA

AERO RACE SHOECOVER RM 4514038

Created using CFD computer modeling  
Smooth Lycra® front  
Textured aero mesh aids smooth air separation

CASHMERE SOCK 4515548

Cashmere blend with nylon and Lycra® added to provide stretch and durability  
Our most popular 13cm length  
Reinforced toe and heel area  
Subdued graphics that allow you to wear them all the time

SIZES: **SM/LX/2XL**    WEIGHT: **55g** (Pair)

LUXURY THAT PERFORMS

Back in 2007 we brought out a Cashmere sock. It was ridiculously expensive but surprisingly sold more Pairs than we expected. We discontinued it convincing ourselves it wasn't racy enough, but our staff kept wearing their Cashmere socks till they were worn out. So we're bringing it back. It seems an extravagance, until you actually wear it and realize how nice it is to have toasty warm feet with this crazy soft yarn.

VENTI SOCK 4513537

Merino Wool Blend  
New 20cm cuff length

SIZES: **SM/LX/2XL**    WEIGHT: **57g** (Pair)

SUPER SIZE

Winter cycling socks used to be 9cm because they'd always been that way...but we had cold feet. So we made some 12cm socks and they were much better. Then we went to 15cm, and they were better still. It seemed logical to go to 20cm, which is right at your calf and really helps keep your feet warm by keeping your entire lower leg warm.

DIVERSO SOCK 4515549

Merino wool blend  
Full-length protection  
12cm cuff

SIZES: **SM/LX/2XL**    WEIGHT: **54g** (Pair)

TEMPESTA LEG WARMER 4515514

Made to wear with the Tempesta 3/4 pant  
Can be used as a normal leg warmer for extra water protection and visibility  
Waterproof Reflex lower leg provides water protection and visibility  
Nano Flex upper portion for water repellency should spray come up under the Tempesta pant  
GIRO³ leg gripper  
Ankle zipper positioned at outside of ankle to prevent water entering

SIZES: **S-XL**      **122g** (Pair)

010  
BLACK

WHEEL SPRAY NO PROBLEM

If you’re riding without fenders you know that the lower legs get wheel spray from both front and back and are one of the hardest spots to keep dry. So we made the lower part of this leg warmer with waterproof reflective fabric so that the spray will just run off. You wear this warmer with your favorite shorts, underneath the Tempesta 3/4 pant, and OVER your waterproof booties. You get ventilation under the pant, and because the warmer is placed over the bootie, the rain just runs right off. The large reflective area on your moving legs is highly visible for extra safety, and in our testing this piece has become a favorite for night rides.

NANO FLEX WARMERS

Water-resistant Nano Flex fabric  
Same breathability, stretch, and warmth as our standard Thermoflex warmers  
Double-sided silicone grippers keep the warmers in place  
Ankle zips (leg warmers)  
Great in every possible condition

HOW DO THEY DO THAT?

We always strive for total performance and total innovation, but sometimes we surprise ourselves. This Nano Flex fabric behaves just like our Thermoflex fabric in dry conditions, but then provides unbelievable water repellency when it starts raining. We don’t claim that it’s fully waterproof, but it’s the most effective product we’ve ever made for keeping you comfortable in all conditions. It’s just short of a miracle.

TEMPESTA CAP 4515517

Exclusive eVent® ultralight 70 g fabric  
Traditional cycling cap cut with flip-up visor  
Neck flap to prevent water running into your jacket  
Completely waterproof with taped seams  
Reflective trim on back  
Fits under helmet

SIZES: **UNI**      **28g** (Large)

008  
GREY

KEEPS A LOT OF HEAT IN

This cap creates a remarkable barrier from the rain. Our exclusive eVent® ultralight fabric keeps all the rain out but also keeps a lot of heat in, which makes a big difference when you’re riding on colder rainy days. This cap is recommended for colder conditions or moderate-intensity riding.

TEMPESTA HOOD 4515518

Exclusive eVent® ultralight 70 g fabric  
Cut as a detached hood to wear with one of our rain jackets  
Completely waterproof with taped seams  
Nano Flex fabric around the face opening for more breathability and stretch  
Can be worn under the chin or over the face

SIZES: **UNI**      **52g** (Large)

008  
GREY

KEEP EVERYTHING OUT

We created this separate hood to slip over your head and over the collar on your jacket to completely insulate your head and prevent rain from running into your jacket. We cut it thin to fit under a helmet, gave it a visor to keep rain out of your eyes, and made it so you can pull it down under your chin when you warm up or wear it over your face for extra protection. We hope you’ll never need this piece, but if you ride in nasty conditions it’s unequalled.

ESTREMO WS SKULLY 4515552

FOUL WEATHER RACE PROTECTION

“Difesa” is the Italian word for defense, which is exactly what this cap offers. It’s made of the same fabric that we use on the Gabba to give you full wind protection, good rain protection and excellent breathability. This cap is so warm we had to make the back panel in Nano Flex to let off some of that extra heat. Flip-down earflaps allow the cap to cover a wide range of conditions.

VIVA THERMO SKULLY 4514550

Thermoflex is warm, soft and stretchy  
Flat-lock stitching

10M LUNG WARMER 4515503

Windstopper® 3-layer fabric covers lungs and air passages to help with breathing in cold weather  
Neck is cut high to keep out drafts  
Tear-away Velcro closure makes it easy to take off when the race heats up

SIZES: **UNI**    WEIGHT: **32g** (Large)    < 5°C / < 41°F

THEY USED TO USE NEWSPAPERS FOR THIS

During warm-up and the early part of the race, this piece will keep your lungs and airways warmer to help you breath easier. This totally windproof layer fits between your base layer and your race suit, covering just the upper part of the torso—kind of like they did with newspapers back in the day. When you’ve warmed up, you just grab the neck closure and slip the piece out and toss it to your mechanic in the pits.

WS BALACLAVA 4511555

Windstopper® X-Fast on front for wind protection  
Warmer fleece fabric feels soft and wicks moisture  
Feels comfortable under your helmet

010  
BLACK

A woman in a black and white cycling kit is riding a road bike up a paved mountain road. The road curves to the left. The surrounding landscape is filled with tall, thin evergreen trees with bright yellow autumn foliage. In the background, a snow-capped mountain peak is visible under a blue sky with scattered white clouds. The scene is captured from a low angle, emphasizing the steepness of the climb.

WOMEN

## SUN TO SUMMIT

The sun is up, bright and cold. It's a perfect morning to get out and put in some miles on the mountain. Once outside of town the pines thin, the road tilts up, and the real climb begins.

There are times when getting out to ride can be an elusive window of free time in a day structured by schedules. Life gets in the way. But that isn't this day.

You climb steadily, watching not so much the road but taking in the expansive vistas that you can only experience at elevation. The summit is a both a relief and a reminder: the way down, although exhilarating, will be far too short.

ELEMENTO 2 7X(AIR) W JACKET 4515557

Our 7x(Air) fabric technology meets Alpha construction to make your ultimate winter jacket

A new standard in balancing light weight, stretch, breathability and warmth

Castelli-exclusive 7x(Air) quilted fabric with WindShear inserts

Fleece lined for warmth with a separate fleece layer on the front

Articulated fleece collar gently wraps around the neck in every cycling position

Raw-edge wrist cuffs and waist lie flat and seal out the cold

3 external rear pockets plus a zippered front key pocket

Close-to-body aero fit

Reflective tabs

SIZES: XS-XL    WEIGHT: 425g (Small)    0°-12°C / 32°-53°F

IT JUST KEEPS GETTING BETTER AND BETTER

In 2013 we invented the 7x(Air) fabric—a proprietary windproof fabric that provides seven times the air permeability of existing membrane fabrics.

In 2014 we invented the Alpha jacket with a number of innovative construction techniques to revolutionize the performance and comfort of a winter cycling jacket.

For 2015 we bring those two technologies together in the Elemento 2 7x(Air) jacket.

ALPHA CONSTRUCTION

Alpha construction is the result of totally rethinking the construction of a winter jacket. On the front we’ve separated the windproof layer from the insulating layer, giving you far greater control over ventilation, and when you’re working hardest you can open the external zip to allow airflow to dry the thermal layer. It’s hard to imagine until the first time you crest a hill and close the zipper back up and realize you’re totally dry. You’ve never felt anything like it.

7X(AIR)

7x(Air) is a technique we invented in which we quilt our WindShear fabric to give added air permeability through thousands of quilting holes. You won’t actually feel the windflow; you’ll just feel drier.

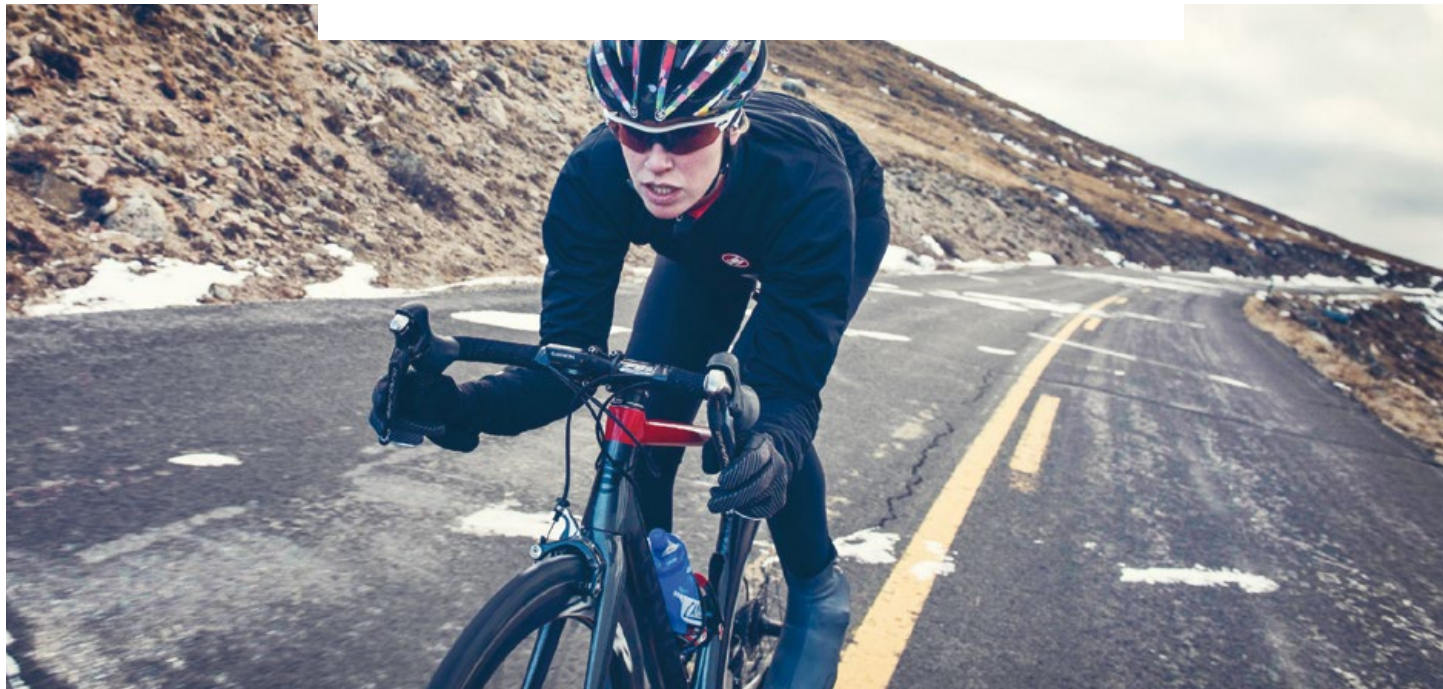

## MAXIMUM TEMPERATURE REGULATION

With Alpha we've detached the insulation layer from the windproof layer so that you can open the windproof layer while climbing to let air in to ventilate and help evaporate moisture. When you've hit the summit, zip up the windproof outer layer and enjoy a warm, dry descent.

ROSSO CORSA

### ALPHA W JACKET 4515558

Articulated collar that fits better whether standing or riding

Windstopper® 150 fabric is windproof and water resistant, with four-way stretch for freedom of movement

Better ventilation and better moisture evaporation thanks to separate insulating layer

Asymmetric external YKK Vislon® zipper slides easily and lies flat

Raw-edge waistband with silicone gripper lies flat and moves with you

Raw-edge wrist cuffs lie flat for a perfect interface with gloves

Back ventilation

Front zippered pocket

3 rear pockets

Zippered rear pocket with reflective webbing

### WE STARTED WITH A BLANK SLATE

At the waist we have a new fabric and construction that lies completely flat and is streamlined for aerodynamics, yet when you drop into the riding position it follows your body without binding or billowing. At the wrists we have a new flat raw-edge construction that interfaces perfectly with our gloves to keep drafts out and improve comfort. At the collar we have a new articulated construction that follows the angle of your neck whether you're standing or riding in the lowest aero position.

With our latest fabrics we can essentially build a winter jacket that will keep you warm in all but the most extreme conditions with just a base layer underneath. Riding in these pieces shows how effective they are at regulating temperature and comfort while helping to keep you drier.

MORTIROLO W JACKET 4515559

Windstopper X-Fast protection on front, sleeves and yoke for soft breathable insulation  
Back in Warmer thermal fleece fabric to help with ventilation  
3 rear pockets  
Reflective tabs

## NEARLY THE IDEAL JACKET

This would be the ideal jacket but we didn't design it for extreme cold or rainy conditions. But that's what makes it so good for most of your fall/winter/spring riding. Our warmest Windstopper® fabric does the protection duty on the front and sleeves, while we've done the back in our fleecy Warmer fabric to give you far better moisture management.

We recommend this jacket for temperatures above 6°C/42°F exactly where you'll likely do most of your riding. The fit is close-to-body without being overly tight and we've carefully finished the details from the YKK® Camlock zipper down to the elastic in the waistband.

CROMO LIGHT JACKET 4514555

Voile Whisper fabric front provides lightweight wind protection  
Articulated collar that fits better whether standing or riding  
Warmer base fabric provides effective insulation and excellent moisture management  
Double-layer front with separate wind and insulation layers  
Front zippered pocket

MORE FUN

If your idea of fun doesn't include trying to survive rides in the coldest possible conditions, this jacket will elevate your fun in cool conditions. The base fabric is our tried-and-true Warmer brushed fleece fabric that keeps you warm and dry, and we've overlaid the front bits with our new Voile Whisper fabric for nearly weightless wind protection while allowing a high level of air permeability. The double-layer front provides unprecedented ventilation and moisture management.

GABBA W 4515574

Fully aero, fully breathable and fully protected

Windstopper® X-Lite Plus fabric for lightweight total wind protection with water-repellent finish

Nano Flex fabric insert under arms

Storm-flap construction at back protects from wheel spray

Silicone gripper on waistband to limit ride-up

Full-length YKK Vislon® zipper with wind flap

3 rear pockets with drain mesh

Rear reflective trim on pockets and flap for high visibility

SIZES: **XS-XL**    WEIGHT: **296g** (Small)    **10°-18°C / 50°-64°F**

SURPRISINGLY VERSATILE

When we developed the original Gabba with the Cervélo TestTeam we knew it would be ideal for cold and wet racing. The first few years it remained a niche product for pro racers and a few people who understood how good it was in the wet.

The women's version is identical to the men's version except for the fit and the availability of the violet color. It's been proven in every single rainy pro race over the past five years, and despite every other company trying to copy it, there's a reason why the pros are still buying the original Gabba.

Then we started seeing the pros use it in cool, dry conditions and receiving consumer comments about how many people were using it those conditions as well. Then it exploded, and now it gets described as "the best bit of kit I own" or "the best jacket I've ever had."

GABBA W LONG SLEEVE 4514557

Fully aero, fully breathable and fully protected

Windstopper® X-Lite Plus fabric for lightweight total wind protection with water-repellent finish

Nano Flex fabric insert under arms

Storm-flap construction at back protects from wheel spray

Silicone gripper on waistband to limit ride-up

Full-length YKK Vislon® zipper with wind flap

3 rear pockets with drain mesh

Rear reflective trim on pockets and flap for high visibility

SIZES: **XS-XL**    WEIGHT: **296g** (Small)    **6°-15°C / 43°-59°F**

COLD, DRY AND WET

-  Cold and dry conditions
-  Wet and damp conditions
-  High visibility

TRASPARENTE DUE W JERSEY FZ 4515560

Windstopper® X-Lite stretch fabric on front is windproof and splash resistant  
Warmer fabric on back for high breathability  
YKK® Camlock zipper  
Elastic gripper on waist to limit ride-up  
2 rear reflective tabs

SIZES: XS-XL    WEIGHT: 238g (Small)    10°-18°C / 50 °-64°F

PUFFY JERSEY FZ 4515561

PrimaLoft® 60 insulation on front and sleeves with Torray®  
30 g water-repellent outer layer  
Warmer fleece on sleeves and back  
3 external rear pockets  
Zippered pocket

SIZES: XS-XL    WEIGHT: 229g (Small)    6°-15°C / 42°-59°F

LUXURIOUSLY WARM

We've brought the lightweight warmth of your favorite down jacket to this surprisingly versatile jersey. PrimaLoft® 60 insulation is warm like goose down but without the downsides. The inner mesh lining helps increase breathability, while the external windproof layer gives the jersey an extremely wide comfort range.

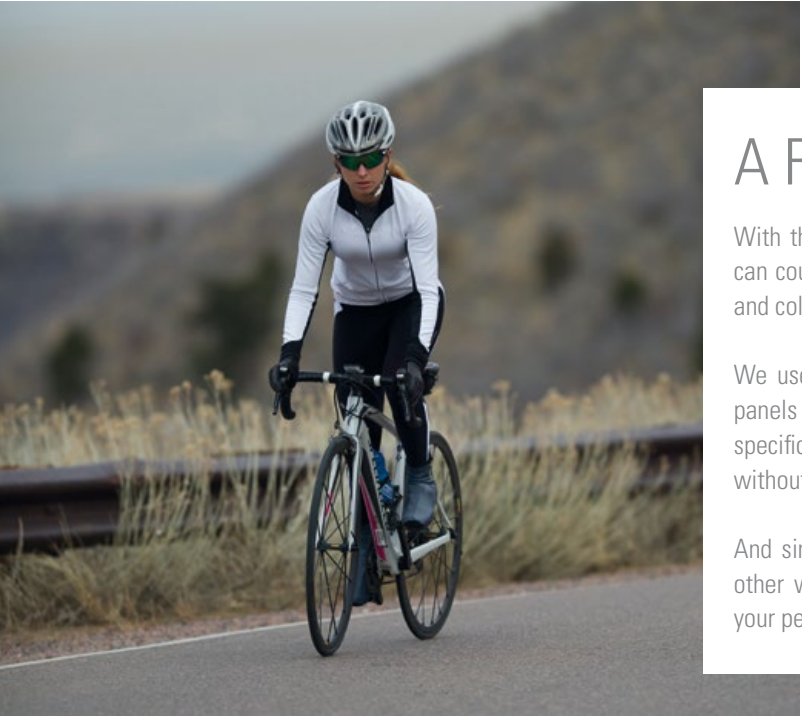

ILLUMINA JERSEY FZ 4514559

Brushed 100% polyester Riga 3D rib knit-look fabric  
Voile Whisper overlay on upper chest  
Full-length YKK® Camlock zipper  
3 rear pockets  
Reflective rear tabs

SIZES: XS-XL    WEIGHT: 204g (Small)    12°-20°C / 53°-68°F

YOU'LL WANT TO WEAR IT MORE

Our new Riga 3D brushed fleece fabric is gorgeous for a long sleeve jersey, both in function and aesthetics. It's so beautiful that you'll want to wear this jersey in conditions beyond what the Riga 3D fabric would normally allow, so we've added an overlay on the upper chest in Voile Whisper fabric to give it some added wind protection.

A RUNAWAY SUCCESS

With the women's Trasparente full-zip long-sleeve jersey, you can count on having all the necessary coverage from the wind and cold while still feeling sleek and elegant.

We use the X-Lite stretch Windstopper® fabric for the front panels and forearms and over the tops of the shoulders. This specific placement makes the jersey effectively wind resistant without inhibiting your freedom of movement.

And since X-Lite has more than 10 times the breathability of other wind-protection fabrics, the Trasparente works to keep your perspiration from building up and cooling you off.

## ESSENTIALLY RIGHT

We created this to be the essential fall/spring long-sleeved jersey. Tastefully timeless styling with our new Strada Termico fabric disguises the highly functional floating second layer in the upper chest. In cooler conditions, keep the zipper closed and benefit from two layers of warmth. If you need ventilation, open the zipper and the inner layer helps diffuse the air for overall comfort.

### CROMO JERSEY 4514558

# UNCONVENTIONAL RAIN PROTECTION

We seriously broke with convention with this totally waterproof shell. First off, it breathes. Our exclusive ultralightweight 70g eVent® fabric lets out the sweat at a remarkable rate. Second, it fits. Fits like a cycling jacket, not a mountaineering jacket. Third, it packs down small (probably much smaller than the rain shell you’re currently using) to fit in a pocket when you don’t need it. Finally, we gave it details that make a lot of sense, like external pockets that are easy to access with gloved hands and an extra-high collar and an easy-sliding waterproof zipper.

## DONNINA RAIN JACKET 4515564

- Exclusive ultralightweight 70 g eVent® fabric
- Stretch water- and windproof inserts at elbow, shoulder, side panel and spray flap
- YKK waterproof Vislon® zipper
- 2 external rear pockets
- Quick-lock drawstring wrist closure with magnetic string keeper
- Silicone elastic waistband
- Reflective trim for 360° visibility
- Fully taped seams for total waterproof construction
- Packs up small to easily store in jersey pocket

SIZES: **XS-XL**    WEIGHT: **168g** (Small)    **6°-20°C / 43°-68°F**

## HARD OR SOFT SHELL? YES

Hard-shell rain protection but with the stretch of a soft shell. Our new Torrent 2L Stretch fabric offers total waterproofness with outstanding stretch and good breathability, making this an ideal jacket for just about all your winter or spring riding. We’ve added a waterproof zipper, high collar and external seam taping to keep the water out, while vents help prevent overheating.

## SOTTILE W JACKET 4513561

- Sleek, performance-fit, lightweight, packable jacket
- Fits in any jersey pocket without weighing you down
- Wind-resistant and breathable fabric - Waterproof 10000mm MVP Breathability 8000gr/m2
- Full-length zipper
- Zipper opening at back for access to jersey pockets
- Rear reflective tabs
- 100% polyester

# NEVER GET CAUGHT OUT

We've engineered an extremely high amount of protection into a minimum-sized package. Using a 30 g/m2 water-repellent and windproof fabric, we've created a jacket that disappears into half a jersey pocket when not in use, yet provides wind and rain protection when needed. Fit is predictably Castelli: close to body to minimize flapping fabrics. Serious equipment for unpredictable conditions.

# OUR BEST WINTER TIGHT. EVER.

We've put all our best technologies into the Sorpasso W tight: the Progetto X<sup>2</sup> Air women's-specific seat pad and a mix of lightweight fabrics, including our warm Thermoflex Core2. By applying the technical advancement of hollow-core fibers, we've made these tights not only lighter than your normal tights but also warmer—and they keep you drier. Ankle zips are YKK<sup>®</sup> Camlock, and covered with reflective tape for night visibility. Now you're ready to put in those long base rides all winter long.

PERFECTION  
SIMPLIFIED

The Meno products offer minimalist design that concentrates on function. This wind-protecting bibtight is singularly focused on keeping you warm and comfortable in cold conditions. Our AirFlex Thermo fabric is the stretchiest windproof fabric we've ever made and allows us to make this tight fit great. It's ideal for conditions from 5°C/40°F and down ... as low as you're willing to ride.

COME RAIN OR SHINE

We usually talk about the water-repellent features of our Nano Flex fabric, but its performance in dry conditions is equally remarkable. This fabric has dry performance similar to that of our Thermoflex fleece tight fabric, with the added ability to shed rain when needed. You don’t compromise breathability, only a bit of softness. So this tight is ideal for anyone riding in mixed conditions with a chance of rain, but you’ll be completely comfortable even if it doesn’t rain a drop.

PASTEL BLUE

FOR THE  
WOMAN RIDER

Colors and fit designed for women riders, with ultimate protection. Heavy protection is provided by our breathable, windproof water-resistant exterior, with reflective pops to keep you visible on gray days.

# PROGETTO X<sup>2</sup>

The Progetto X<sup>2</sup> Air seat pad is used with its ventilated skin-care layer to keep you cool. Its two-layer design and multi-density padding ensures excellent comfort no matter how long your epic ride is.

### 1. SKIN CARE LAYER

A four-way stretch, microdenier, seamless, bacteriostatic layer made to adapt to the shape of your body and saddle without any folds in the fabric. Air flows right into the surface fabric to aid evaporation.

### 2. SEAMLESS INTEGRATED TECHNOLOGY CUSHIONING LAYER

Multi-density foam with infinitely variable thickness. The thickness of the pad is engineered to place the padding where you need it most for maximum comfort.

### 3. VISCOUS COMFORT INSERTS

Perforated viscous padding is added under the highly sensitive ischial and perineum pressure areas.

# KISS<sup>AIR</sup>

The New improved KISS Air seat pad aims to incorporate as many of the features and comfort as our top-of-the-line Progetto X<sup>2</sup> Air seat pad but at a more affordable price.

### 1. SEAMLESS SKIN CARE LAYER

A super soft, brushed microfiber top that maximizes comfort and fit. Seamlessly engineered to eliminate chafing and abrasion. Flexible to move with you. Bacteriostatic treatment to avoid saddle sores and infection.

### 3. ANATOMICAL SHAPE

Comfort is further enhanced by creating a perfect interface to your body during every pedal stroke.

### 2. DUAL DENSITY, INFINITELY VARIABLE THICKNESS

Dual density and infinitely variable thickness gives you the perfect cushioning for every part of the pad. Maximum thickness and density in the ischial zone, tapering to moderate thickness in the perineum, and minimum thickness at the perimeter.

# CASTELLI FABRIC TECHNOLOGY

When you're obsessed about cycling technology, it's easy to get carried away with tech-speak and jargon. Here is a brief explanation of some of the revolutionary technology behind our products.

## WARMER

Warmer is more than a name, it's exactly what the fabric delivers during workouts. Its fleecy inside keeps you warm, while 100% polyester fibers quickly wick sweat away. It's the fabric of choice when thermal insulation is equally important as moisture management.

## EVENT®

eVent waterproof fabric keeps you dry in wet conditions. It's waterproof outside while allowing perspiration to escape from the inside through millions of tiny pores. In fact, eVent is 30% more breathable than its next closest competitor. eVent is the smartest choice for athletes who need and demand the highest possible performance and comfort from their apparel.

## WINDSTOPPER® X-LITE

The highly stretchable Windstopper® X-Lite fabric moves naturally with your body and doesn't restrict movement. It also delivers unprecedented performance, with 100% wind protection, and up to ten times greater breathability compared to other windproof fabrics.

## THERMOFLEX CORE2

Thermoflex times two. We've extended the comfort range of Thermoflex in both directions. The Core2 version features a polyester inner layer with a nylon outer layer, giving a push-pull moisture transport system that keeps you drier so you're comfortable in conditions when regular Thermoflex is too warm. But that polyester inner layer is made with hollow-core yarns for extra insulation, and with a tighter knit that keeps more air out.

## 7x(AIR)

A brand new fabric with engineered air exchange to keep you warm and dry even at maximum effort levels. The fully wind- and waterproof external layer is quilted to a microfiber fleece inner layer. The resulting wind resistant fabric essentially eliminates wind chill, while the stitch holes allow 7 times more air permeability than the fabrics used on our Windstopper® jackets.

## WINDSTOPPER® 150

Light elastic protection. That's the key to our lightest Windstopper® three-layer knit fabric. You have trusted Gore® total windproofness, excellent breathability, functional stretch and DWR coating for water repellency. This fabric has opened up new possibilities in constructing layered garments for enhanced fit and temperature and moisture management.

## NANO FLEX

Exclusively engineered by Castelli. We take our thermal fleecy stretch Thermoflex fabric and coat it with millions of tiny nanofilaments to create the most water-repellent fabric finish ever. Drops of water stay as spherical balls on top of the fabric or bounce off the fabric without leaving a trace.

## WINDSTOPPER® X-Fast

Total wind protection and great breathability. This fabric uses an internal brushed fleece for excellent insulation and to reduce moisture buildup. It is treated with a DWR water-repellent finish to shed rain.

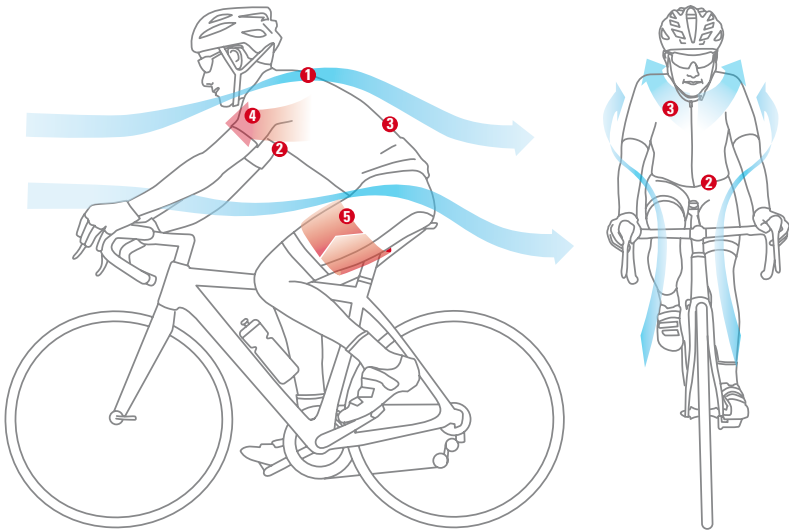

## OUTDRY®

OutDry® patented technology achieves a fully water-proof, windproof and breathable laminated glove outer shell. With OutDry®, the elements are stopped at the first layer and with no extra layer of water, gloves breathe better and stay flexible.

# AT CASTELLI, WE OBSESSIVELY TEST AND REFINE TO GIVE YOU THE BEST FITTING, HIGHEST PERFORMANCE CYCLING APPAREL.

- 1 On the bike, your Castelli jersey should fit close to the skin.
- 2 Off the bike, your Castelli jersey might feel tight across the chest and a little short in front.
- 3 Castelli ProSecco treatment helps perspiration evaporate quickly to keep you cooler and drier.
- 4 Castelli jerseys are designed with the sleeves articulated forward for maximum aerodynamic performance.
- 5 Bibshorts should fit tightly enough to support critical leg muscles through compression without inhibiting movement and constricting blood flow.
